Professional Summary

MERN Stack Developer with 1+ year of experience building scalable full stack applications using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Skilled in designing RESTful APIs, implementing secure authentication and authorization, and developing responsive, SEO-friendly user interfaces using server-side rendering (SSR) and modern frontend technologies. Experienced with TypeScript, Fastify, and performance-focused development practices.

Experience

MERN Stack Developer **Mar 2026 – Present**
Solutyics

- Engineered scalable full stack applications using Node.js, Express.js, React.js, MongoDB, and PostgreSQL, ensuring efficient performance and maintainability.
- Designed and implemented RESTful APIs with structured routing, validation, and secure authentication.
- Integrated tRPC and Drizzle ORM for type-safe backend communication and optimized database interactions.
- Developed reusable, responsive UI components using React.js, TypeScript, Tailwind CSS, and Mantine UI.
- Built server-side rendered (SSR) pages and optimized routing using Next.js to improve performance and SEO.

Associate Software Engineer (Part-Time) **Apr 2026 – Present**
TechBuzz

- Developed full stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built and integrated RESTful APIs to support dynamic frontend functionality and data-driven features.

MERN Stack Developer Intern **Jul 2025 – Dec 2025**
Devfied Software House, Lahore

- Built full stack features using MongoDB, Express.js, React.js, and Node.js across frontend and backend layers.
- Developed and tested RESTful APIs for authentication and CRUD operations, improving application reliability.
- Designed responsive user interfaces using React.js and Tailwind CSS.

Projects

TEO-AI — Contract Management System

- Designed and developed a full stack system using React.js, TypeScript, PostgreSQL, tRPC, and Drizzle ORM.
- Implemented efficient data fetching with TanStack Query and type-safe communication across services.

CargoPro — Logistics Management System

- Developed backend services using NestJS, TypeORM, and PostgreSQL, with API documentation via Swagger.
- Built responsive frontend interfaces using React.js and Tailwind CSS.

Awan Sports — Industrial Production Management

- Implemented high-performance backend using Fastify, PostgreSQL, and Drizzle ORM.
- Designed modular frontend architecture using React.js, TypeScript, and Tailwind CSS.

QualiFlow — Quality Management System

- Developed a full stack system using Fastify, PostgreSQL, Drizzle ORM, and TypeScript.
- Built modern frontend using React.js, TanStack Query, Zustand, and shadcn/ui.

Technical Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Mantine UI, shadcn/ui
- **Rendering:** Server-Side Rendering (SSR), Static Site Generation (SSG), Client-Side Rendering (CSR)
- **Backend:** Node.js, Express.js, NestJS, Fastify, tRPC
- **Databases:** MongoDB, PostgreSQL, SQL, Drizzle ORM, TypeORM
- **APIs:** RESTful APIs, Authentication, Authorization
- **State Management:** Zustand, TanStack Query, Redux, Context API
- **Tools:** Git, GitHub, Docker, Postman, Swagger

Education

BS Information Technology (Software Engineering) **2021 – Aug 2025**
Govt. College Township (PU Affiliated), Lahore CGPA: 3.00
